

Security Policies for VPN Connections during IKE Phase 2 (IPSec)

Please note the correct writing of the policies. If the spelling of a security policy is not correct, the configuration will be ignored during the import.

IPSEC Strategies for *phase2ss*

"esp-aes-sha/ah-sha/comp-lzjh/pfs";
"Access to the AVM Access Server, high security";

"esp-aes-sha/ah-all/comp-lzjh-no/pfs";
"Default policy for the AVM Access Server";

"esp-aes-sha/ah-no/comp-lzjh/pfs";
"Access to the AVM Access Server without AH";

"esp-3des-md5/ah-no/comp-lzjh/pfs";
"Access to the AVM Access Server, medium security";

"esp-3des-sha/ah-no/comp-no/no-pfs";
"Access to the WatchGuard Firebox";

"esp-all-all/ah-all/comp-all/pfs";
"All algorithms, including PFS";

"esp-all-all/ah-all/comp-all/no-pfs";
"All algorithms, without PFS";

"esp-des|3des-all/ah-all/comp-all/pfs";
"All algorithms supported by Cisco, including PFS";

"esp-des|3des-all/ah-all/comp-all/no-pfs";
"All algorithms supported by Cisco, without PFS";

"esp-des|3des-all/ah-all/comp-no/pfs";
"MD5/SHA1/DES/3DES algorithms, including PFS";

"esp-des|3des-all/ah-all/comp-no/no-pfs";
"MD5/SHA1/DES/3DES algorithms, without PFS";

"esp-3des-sha/ah-no/comp-no/pfs";
"Linux FreeS/WAN including 3DES and PFS";

"esp-3des-sha/ah-no/comp-deflate/no-pfs";
"Linux FreeS/WAN including 3DES and compression";

"esp-all-all/ah-none/comp-all/pfs";
"All algorithms, without AH, including PFS";

"esp-all-all/ah-none/comp-all/no-pfs";
"All algorithms, without AH, without PFS";

"esp-aes256-3des-sha/ah-all-sha/comp-lzs-no/pfs";
"AES 256 bit or 3DES, AH optional, SHA, PFS";

"esp-aes256-3des-sha/ah-no/comp-lzs-no/pfs";
"AES 256 Bit or 3DES, no AH, SHA, PFS";
